

System Architecture Diagram

Simplified overview of components, data flow, and deployment

1 · SYSTEM LAYERS

2 · LIVE SESSION FLOW

3 · WHAT EACH PART DOES

Part	Role
 Frontend (Vercel)	UI, webcam capture, shows charts & live stats
 Backend (HF Spaces)	API server, processes frames, handles login
 ML Pipeline	Detects face → predicts emotion → calculates focus score
 MongoDB Atlas	Stores users, sessions, and all emotion data
